University of Hull
B.S in Computer Science
2013-2016
Learned software engineering, cyber security, compiler principle, data engineering, database, embedded system, computer networks, computer architecture, programming languages including C++, JavaScript, PHP, Java, C#, etc. Wrote a graduation paper on big data technology

Summary

I consider myself as an accomplished developer with 7 years of experience in web development who can create applications for web and mobile platforms.
Fortunately, I possess extensive experience in Web & Mobile Development, constantly delivering the best results to my customers over my years of experience.
In general, I'm a very flexible person interested in learning new things. I love working on startup products and I enjoy learning new skills and search for smart decisions for complex problems as well as always trying to stay at the edge of best modern development practices.

Experience

11/2022-Now
Full Stack Developer • **Freelancing**
- Rebuilt backed from custom PHP to Laravel
